## Sentry Sunset Notification

Effective April 15, 2010, Wiresoft Operating Company will no longer continue to support Wiresoft Sentry units. We have been notified by our AV partner that based on the platform changes they have developed since our initial partnership, they cannot continue to support Sentry AV needs.

All persons/companies who have a Sentry unit with a current AV subscription and need assistance with this issue are asked to contact Stewart Lewis (513-297-3155 opt 105).

Wiresoft has available different options for our clients to retain their complete threat management protection. Please contact us.

Thank you.
