

Wiresoft Helps Lawyers Spend More Time on Clients, Less on Spam

Problem:

Anderson Hunter Law Firm represents many large corporations and local municipalities. The firm is a full-service law firm, with attorneys who provide a broad range of litigation and transaction services to their clients. Anderson Hunter has endured and grown because they have successfully and consistently adapted the tradition of hard work and quality service to contemporary circumstances.

Two years ago network threats became an ongoing challenge; mainly spam but also viruses, spyware, and phishing scams. As most solutions address only one problem, and to avoid the decision to purchase point solutions or completely outsourcing their technology, they decided that they needed a security platform that was flexible enough to handle the wide range of potential intrusions. After an extensive evaluation of several options, their IT consultant suggested and implemented the Wiresoft UTM.

How Wiresoft Solved the Problem:

“We figured the Wiresoft UTM stops about 3,000 spam emails a week. Spam was a huge clog in our artery until we installed the Wiresoft UTM.” Anderson’s network would slow down and the users were spending time marking emails as spam. The Wiresoft UTM was installed in bridge mode in front of their exchange server and they have kept Norton for the added layer of protection.

“The Wiresoft UTM installed seamlessly within our infrastructure. I felt that too many infrastructure changes could cause problems so we decided to run the Wiresoft UTM in bridge mode with the existing firewall. It is stopping Spam and we are completely happy with the Wiresoft UTM!” Stephen Peterson, IT director

About the Wiresoft UTM:

Wiresoft Net, Inc. is a leading provider of network security solutions specifically designed for small- and mid-sized businesses. The Wiresoft UTM Platform is a four-in-one problem solver, offering complete protection and freedom from business interruption with an impenetrable firewall, anti-virus defense, spam blocking and VPN connectivity. Built upon proprietary artificial intelligence technology, the Wiresoft UTM Platform monitors your incoming and outgoing traffic 24/7/365, while continuously performing automatic virus and system updates. The complete, multifunctional and expandable enterprise-level network protection ensures your network remains healthy and secure, all the time.

The Wiresoft UTM Platform has undergone rigorous performance testing by Proteus|OTM, the IT industry’s leader in software and hardware evaluation. A downloadable report of the professional assessment is available on the Wiresoft web site. For more information about Wiresoft, Inc. and the Wiresoft UTM Platform, visit www.wiresoft.com or call us toll-free at 866-333-4567.
