

CITY OF ABERDEEN

Wiresoft's Healthy Solution for an Unhealthy Network

The Problem:

The City of Aberdeen was receiving thousands of spam e-mails per day. They had utilized approximately twenty different spam blockers with no success in eliminating the spam problem. More critically, they were experiencing problems with viruses. Their network was receiving a virus about every 10 days creating massive disruption in the operation of their network. Incidentally, Aberdeen was burdened with costly downtime as technicians would troubleshoot and fix the problem to get all computers on the city network up and running again.

The WIRESOFT Solution:

When the Wiresoft UTM Platform was installed, the amount of spam e-mails decreased to *ZERO*. Over the course of the past two years the Wiresoft UTM has been implemented, no viruses have invaded their network. Aberdeen also found the anti-virus software user friendly and easy to manage. They benefited from Wiresoft's Virtual Private Network (VPN) as it was quite useful for remote account management.

"It is very easy to get into and add people to the system" Sandy Mullin, City of Aberdeen.

"It's the best anti- spam product that I have used, and I have used at least 20 different kinds"
Bill Nowak, IT consultant to the City of Aberdeen

Firewall penetration by hackers and other unauthorized personnel was eliminated. The Wiresoft UTM saved Aberdeen time and money – direct and indirect costs – as their virus and spam problems were solved by the Wiresoft UTM.

About the Wiresoft UTM:

Wiresoft Net, Inc. is a leading provider of network security solutions specifically designed for small- and mid-sized businesses. The Wiresoft UTM Platform is a four-in-one problem solver, offering complete protection and freedom from business interruption with an impenetrable firewall, anti-virus defense, spam blocking and VPN connectivity. Built upon proprietary artificial intelligence technology, the Wiresoft UTM Platform monitors your incoming and outgoing traffic 24/7/365, while continuously performing automatic virus and system updates. The complete, multifunctional and expandable enterprise-level network protection ensures your network remains healthy and secure, all the time.

The Wiresoft UTM Platform has undergone rigorous performance testing by Proteus|OCM, the IT industry's leader in software and hardware evaluation. A downloadable report of the professional assessment is available on the Wiresoft website.
